

Semantic Data Integration Report (Team 1)

Mohsen Safi Najafabadi, Mohammadamin Azin, Mohammad Almasi, Shabnam Hamzehloofard, Mona Manoochehri

Task2. Week 4,5 (22.05 – 25.06) - Schema Matching & Mapping

(4th -5th week)- Develop at least three different matchers

We merge the datasets and make mediated schema automatically. Then combine them with 2 string matchers and 1 semantic matcher.

1- Edit Distance Matcher

2- Jarowinkler Matcher

3- Word2vec Matcher

First of all we implemented three matchers and compared our data sets and Mediated Schema by matcher

Contributions:

Mohammad Almasi:

Implemented the Jacard matcher.
 develop or read the datasets in python.
 Trace of code and debugging.
 Test of Jacard matcher with small data.

Mona Manoochehri :

Implemented the Edit-distance matcher.
 Used functions in Panda.
 Analyze the subtask.
 Test of Jacard matcher with small data.

Shabnam Hamzehloofard:

Implemented the Edit-distance matcher.
Explorer of Panda library for merging.
Analyze the subtask.
Test of Edit-distance matcher with small data.

Mohsen Safi Najafabadi:

Analyze the subtask.
develop or read the datasets in python.
Explore combination techniques.
Test of Edit-distance matcher with small data.

Mohammadamin Azin:

Analyze of the subtask
Explorer of Spacy library for merging.
Explore combination techniques.
Test of Edit-distance matcher with small data.

All of Python codes Uploaded in The GIT folder of the group.

Task2. Week 6 (22.05 – 25.06) - Schema Matching & Mapping

(6th week)- Try to use different combining strategies to combine results of matchers

In this Step we combined the result of Matchers for every Dataset and produced a matrix with different strategies.

After this step we applied the threshold on each matrix and produced new matrix.

Then we applied threshold on each matrix.

Contributions:

Mohammad Almasi:

Write the latex report.

Maintained the git repository.

Calculate confusion matrix

Implement and Create Matrix for each combiner (min, max, average)

Implement and Calculate and analyze Precision rate in Python

Implement and Calculate and analyze Recall rate in Python

Implement and Calculate and analyze F1 Score rate in Python

Mona Manoochehri :

Calculate confusion matrix

Implement and Calculate and analyze Precision rate in Python

Implement and Create Matrix for each combiner (min, max, average)

Implement and Calculate and analyze F1 Score rate in Python

Shabnam Hamzehloofard:

Write the latex report.

Calculate confusion matrix

Implement and Calculate and analyze Precision rate in Python

Implement and Calculate and analyze Recall rate in Python

Implement and Create Matrix for each combiner (min, max, average)

Mohsen Safi Najafabadi:

Calculate confusion matrix

Implement and Create Matrix for each combiner (min, max, average)

Implement and Calculate and analyze Recall rate in Python

Implement and Calculate and analyze F1 Score rate in Python

Mohammadamin Azin:

Implement and Calculate and analyze Precision rate in Python

Implement and Create Matrix for each combiner (min, max, average)

Implement and Calculate and analyze F1 Score rate in Python

Task2. Week 7 (22.05 – 25.06) - Schema Matching & Mapping

(7th week)- Develop different selection strategies

In week 7 we applied one to one mapping for every Matrix

DS1- Max Matrix

Contributions:**Mohammad Almasi:**

Write the latex report.

Maintained the git repository.

Implementing JacardFuzy for attribute of data set 1,2,3 and Mediate Schema

Calculate Matrix for each dataset by Editdistance maching

Set and implement Python code threshold for JacardWuzzy Matrix

Calculate confusion matrix

Mona Manoochehri :

Implementing Editdistance for attribute of data sets 1,2,3 and Mediate Schema
Calculate Matrix for each dataset by Editdistance maching
Set and implement Python code threshold for Editdistance Matrix
Calculate confusion matrix

Shabnam Hamzehloofard:

Write the latex report.
Maintained the git repository.
Implementing JacardFuzy for attribute of data set 1,2,3 and Mediate Schema
Calculate Matrix for each dataset by Editdistance maching
Calculate confusion matrix

Mohsen Safi Najafabadi:

Implementing JacardFuzy for attribute of data set 1,2,3 and Mediate Schema
Calculate Matrix for each dataset by Editdistance maching
Set and implement Python code threshold for JacardWuzzy Matrix
Calculate confusion matrix

Mohammadamin Azin:

Get all attributes of datasets in python
Set and implement Python code threshold for JacardWuzzy Matrix
Calculate confusion matrix

Task2. Week 8 (22.05 – 25.06) - Schema Matching & Mapping

(8th week)- Discuss which matchers, combinations, selection work best for your case

TP=6

FP=4

FN=2

Precision=6/10=0.60

Recall=6/8=0.75

F1-Score=0.66

With comparing ground truth table with the result matrix we calculated the performance.

	Min-Prec	Max-Prec	Avg- Prec	Min-Recall	Max-Recall	Avg-Recall	Min-F1	Mx-F1	Avg-F1
DS1-MS	0.63	0.53	0.73	0.65	0.87	0.83	0.63984375	0.658714	0.776795
DS2-MS	0.68	0.61	0.79	0.59	0.73	0.79	0.631811024	0.664627	0.79
DS3-MS	0.72	0.7	0.75	0.64	0.78	0.82	0.677647059	0.737838	0.783439

It is obvious that Average Strategy has the best performance for our MS.
